

Alternative Dispute Resolution; What are your Options

Michael will outline and discuss the various methods of alternative dispute resolution available and used within the modern construction industry. He will outline the basics of the different processes and discuss the pros and cons of each method identified. The use of the various methods in standard forms of contract will be identified and their support by legislation and the common law will be identified.

As Chair of the Institution's Contracts and Dispute Resolution Panel Michael will spend a short time outlining its activities and how members can interact with the Panel.
