

# Quick Guide to...

## Incorporated Engineer (IEng) Standard Route

### Benefits

This is a designation that is recognised around the world, and can be achieved by those in the full range of engineering disciplines. Registration is hard to achieve and its rigour is recognised and valued as a hallmark for all those who hold it.

### Eligibility

Any CICES Member or Fellow who has a suitable academic base for IEng registration.

### How to Apply

- Download the guidebook to registration as an Incorporated Engineer via the standard route from the CICES website ([cices.org](http://cices.org)) to see what is entailed in making an application.
- Download the UK-SPEC document (Engineering Council website [engc.org.uk](http://engc.org.uk)). The assessment is made against the Chartered Engineer specification.
- Complete the expression of interest form from the CICES website and submit it.
- The Membership Department (acting as Engineering Council registration qualifications manager) will advise on next steps; making a formal application, payment of fees and allocation of a mentor, and will answer questions about the process).

### What is Involved?

There are a number of documents to produce for assessment.

- Application form.
- Application fee.
- Completed Engineering Council competence and commitment statements (approx 2,500 words).
- Two page CV.
- Three years of CPD records.
- Professional report (approx. 2,000 words).
- Three Sponsors' questionnaires.

These will then be assessed for completeness and put forward for the review interview.

### Professional Review:

- Review against the UK-SPEC competencies.
- The Professional Review Interview lasts for up to 60 minutes and will include your 15 minute presentation.

### The Outcome

- The award will be made (if successful) by the Engineering Council once the documentation has been scrutinised and cleared.
- The outcome is either successful or not. There are no deferrals or referrals or other grade offered. However, you can resit the Professional Review.
